Dr. Bakshi Ram  
Director  
Sugarcane Breeding Institute  
Coimbatore  
Tamil Nadu

Dear Dr. Bakshi Ram,

It is our great pleasure to honor you for your extra-ordinary contribution towards varietal improvement and advancement in sugarcane production technologies in the country in general and North India in particular. Adoptable sugarcane varieties developed by yourself like CO-0238, CO-0118, CO-98014 in early maturing group and CO-05011 in mid maturing group have boosted the economic status of sugarcane growers by improvement in their cane yield and benefitted the sugar industry through better sugar recovery.

During 2015-16, U.P state sugar recovery was 10.61 % at par with national average and our group has also achieved 11.76 % sugar recovery. It was possible largely because of high genetic potential in the varieties developed by yourself. This notable achievement shows your commitment and dedication with tireless effort for decades. We thank and congratulate you for the outstanding work and research in sugarcane field.

We are happy to welcome you to our plant in Kolhapur and are sure that your inputs and guidance will certainly be helpful in formulating the future strategy for varietal development and further improvement in the varietal performance in Kolhapur.

With best regards,

Your sincerely,

Gautam Dalmia  
Managing Director
