

**Programme 2-1: IMPROVING PRODUCTIVITY OF
PROMISING SUGARCANE VARIETIES BY
INTEGRATED, COST EFFECTIVE AND
SUSTAINABLE CROP MANAGEMENT
TECHNOLOGIES**

P2-02/2-1-8	Agronomical evaluation of promising sugarcane genotypes
P1-12/2-1-24	Influence of glyphosate induced chemical stress on growth, yield and quality of sugarcane
P1-13/2-1-25	Water management with composted coir pith and trash for sustainable sugarcane production
P1-13/2-1-26	Effect of trash management on sugarcane production under wide row planting
P1-13/2-1-27	Productivity, nitrogen dynamics and economics of intercropping under wide row system of planting in sugarcane
C1-14/2-1-28	Developing new technologies for processing sugarcane juice
P1-00/2-2-4	Induction and synchronisation of flowering in <i>Saccharum</i> species and commercial hybrids for utilisation in the breeding programme
