

Programme 3-4: BIOLOGICAL CONTROL OF SUGARCANE PESTS

P1-12/3-4-14	Exploitation of endophytic <i>Beauveria bassiana</i> for the management of <i>Chilospecies</i> in sugarcane
P1-12/3-4-15	Evaluation of potential management tools against internode borer
P1-13/3-4-16	Prospective determinants of virulence and rhizosphere competency in <i>Metarhizium anisopliae</i>
P1-13/3-4-17	Studies on insecticidal molecules of symbiotic bacteria associated with entomopathogenic nematodes
P1-13/3-4-18	Development of DNA Barcodes & species-specific markers for insects in Sugarcane Ecosystem
